Software Graduation project

E-voting system: is a web site that provide secure voting for people, it is support many type of election (individual, list), this project serves the conditions of the elections to the Central Election Commission.

Technology used: ASP.NET 2010, CSS, JS, Ajax, Algorithm.

Hardware Graduation project

Ping pong game: this game consists of two paddles and a ball, we implement the paddle in hardware using motors with two pulleys to move the paddles up and down, and we use c#.NET application for ball movement simulation.

Two players can play using wireless hand (gulf) or keyboard .User can wear gulf and move his hand up or down to play, also can use up/down key to play from keyboard.

Startup weekend

I got my chance to participate in startup weekend Nablus 2012. Me and my team “Afrahi” design a web site that make the management of the customers Events online. Afrahi takes into account the budget and give you hints to manage. It was excited and I learned a lot in all aspects.
